

ST MONICA'S
Catholic Primary School
Footscray

We're here to make a difference

WHAT IS OPEROO?

Operoo is a health and safety system that automatically keeps medical and emergency details up to date for any organisation with a duty of care. It makes these important details instantly available to authorised carers on their mobile devices in an emergency so they know whom to call, what to do, or what to tell an ambulance paramedic.

Operoo automates the permission and consent form process too and can collect any other custom information. It's used by schools, universities, sport, HR, the disability sector, and camps.

HOW DOES ST MONICA'S USE OPEROO?

At St Monica's we use Operoo as our main means of electronic communication with our families. It is predominately our way of sending out student permission for excursions and school-related events. It is also very effective when emailing all important messages and notices that families require. Operoo allows us to include any required attachments as well as capture important information when filling in fields is needed.

It is essential that all new enrolments to our school establish an Operoo profile for each member of the family who attends St Monica's. It is important that you notify the school office - office@smfootscray.catholic.edu.au if you have changed your email.

We are also happy to assist with any questions, issues or concerns that may arise, particularly when logging on and setting up a student profile for the first time.

IS THE OPEROO SYSTEM SECURE?

The Operoo system uses sophisticated security measures to keep data safe. Detailed information about Operoo security can be found on the Operoo website [here](#).
